

An Introduction to Money!

The creation of our nation's monetary supply, as debts bearing compound interest, fulfils one of the definitions for Satanism. Further, we have not changed the fundamentals within our monetary system for centuries, even though, in our modern era, we could now create an asset-based monetary system, operating in the same way that a hydro lake creates electricity, an asset monetary system which frees us from the four financial demons, those of debt, interest, taxation and inflation.

In this asset monetary system, based upon the exchange of labour, a monetary unit which has echoed throughout history, the monetary definition could simply be 'I will go to the sea for a fish, if you go to the hills for fruits, and tonight we will feast'. The monetary measure becomes 'the distance that a typical human being, walking at the normal speed of 5 km/hr, will cover within one hour, that is 5000 metres'. This is a measure for human physiology, human psyche, time, distance and the speed of light, as a metre is a measure of the speed of light within a vacuum. We can now calculate the potential labours of the people within our nation, projected for the year ahead, at an average rate of perhaps \$25 an hour, times 40 hours per week, times 52 weeks per year, times the national population, to create a 'lake' of monetary potential.

This asset monetary lake can now be released through the turbine of monetary policy to power our nation, using a precise rate of flow which will cause neither drought nor flood. This simple monetary system monetises all the realms within our economy, including the beating heart of the commons, the realms which are not presently defined by our economists as 'paid work' as they do not involve the exchange of the debt instruments which we call money.

This asset monetary system frees us from the historical chains of usury and debt peonage, this system awakens us to the realisation that the greatest treasure within our nation is the life force of the people, an awakening which could create an incandescence within the human heart!

This asset monetary system satisfies the economists' dream for a 100% reserve currency, operating with minimal financial costs, those of debt, interest, taxation and inflation. This monetary system also satisfies Aristotle's definition of money, to be portable, durable, divisible, easily recognisable and intrinsically valuable. Humanity, at last, will have joined the other two million species upon our planet whose societies function without using debt!

We do not need to wait for our politicians and bankers to implement this monetary system. We have the resources of millions of people, we have Cyclos banking software, we can create our own asset-based trading market to demonstrate these monetary principles. Once this asset market is established we can then turn our attention to the national monetary system and 'kill' the debt monster which has terrorised us for centuries. This monster can be destroyed through a Shakespearean legal solution, based upon the concept that 'fraud voids all contracts'.

We simply need to prove, within a court of law, that the banking industry loans bank credit, not bank capital, creating a fraud upon the bank's customers who only pay compound interest as they are led to believe that their loans are based upon pre-existing capital. The banks, however, have simply monetised their customer's collateral within a financial mirror called

double-entry bookkeeping. The banks call the reflection in their banking mirror 'bank capital.' The banks can now deposit this imaginary capital into the customer's account, within the form of a loan, bearing compound interest. Astonishingly, the customers are now paying compound interest upon reflections of their own assets! This is a crime of racketeering and pyramid finance so all our banking loans could be deemed void, with the capital and interest returned to the customers, plus a three times cartel penalty. Debt monster, what debt monster?

Centuries of debt could be erased within these courts of law, freeing us from the financial debt markets from history, the debt markets which have imposed the crimes of usury upon our nation, for when we borrow \$1 from the international debt markets, at 6% annual compound interest, calculated daily, over 550 years, our nation accrues a debt of 214 trillion dollars! However, in an asset-based monetary system, a \$1 loan at 0% annual compound interest, calculated daily, over 550 years, creates a debt of only \$1.

It is time we turned this simple asset monetary concept, backed by the greatest moral and spiritual philosophies upon our planet, into a functioning international business. To accomplish this

feat we will need a complete financial re-education of the people upon our planet. We will need to tear ourselves free from the prisons of debt peonage, the prisons which have replaced the iron chains of the historical slaves!

Are you ready for this quantum leap? Are you prepared to free the generations, yet to be born, from the shackles of debt? Are you ready to join the two million species upon our planet whose societies currently function without using debt, interest, taxation and inflation? Are you ready for an incandescence within the human heart?
